Colleagues,

As you will be aware the consultation and negotiation process between CNPA/ CNC, the Civil Nuclear Police Federation, CNC Branch of the Superintendents Association of England and Wales and the trade union Prospect was suspended on the 29th March 2011.

Since that time discussions have been ongoing to achieve common ground where all parties can reach a consensus.

We hope that in the not too distant future that we will have achieved our joint goals, and an agreement can be published. We look forward to recommence the formal consultation and negotiation process that will enable us all to make progress on all the industrial relation matters that effect our member's employment currently.

Moving forward we need to work together to have a clear picture of what the future landscape of the CNC will look like? To be able to define our identity as Police officers within the policing family? Combine all this with the extent the impact of the Winsor review will have on pay and conditions for all our members? Big questions lots of challenges?

We are extremely grateful for the widespread support, and patience we have received across the whole of our membership in these difficult and austere times in the work we carry out on your behalf, and please be assured we will continue to try and meet the expectations you should have of your Police Federation.

Kind regards

Nigel Dennis
General Secretary

Peter Storey
Chairman
