Colleagues,

I trust by now that most of you will be in receipt of your UK Atomic Energy Authority Pensions Scheme Benefit Statement as dated 31 March 2011.

Can we recommend that all members take the opportunity on receipt of this document to scrutinise the document in its entirety. In particular looking at the current estimated amount of transfer value to another approved pension arrangement, and comparing this with previous statements you would have received

If you are in any doubt about the accuracy or otherwise of your UK Atomic Energy Authority Pensions Scheme Benefit Statement, please contact the pension office on 01847 804444 – email: [benefits@ukaea.co.uk](mailto:benefits@ukaea.co.uk) in the first instance.

We are aware of other concerns that members have currently about the administration of their pension scheme as administered by Babcock International group - pensions, and the diminishing confidence and disappointment with the level of customer service and focus that colleagues are receiving at the present time by them.

We have made the CNC “ Head of Profession” Mr Phil Leigh, and Superintendent Colin Robinson HR/OD who represent our employers the CNPA in these matters, and they are acutely aware of the concerns and dissatisfaction of our membership have in relation to this matter. They have advised your Police Federation that they are actively seeking solutions to the issues raised by ourselves in relation to the administration of pensions and level of service as provided by the external contractor Babcock International.

Kind regards

Nigel Dennis  
General Secretary
