Telephone +44(0)1946 815239
Facsimile +44(0)1946 816124

Circular 09/11

6th October 2011

Colleagues,

You will be aware that the Government is currently seeking to change Public sector pensions which include the Combined Pension Scheme of which the majority of Federated ranks are members. To date many proposals have been cascaded by the Media, Government departments and Pension administrators which point to an overall 3.2 percent increase in contributions, a change from final salary to career average scheme and possible increase in retirement age. The CNPF have had no formal indication from our employers the CNPA of if, how or when these changes might affect our members but be assured that specialist pension advice will be sought at the earliest opportunity following consultation.

Members are strongly advised of the potential and inherent dangers of using social media sites, when making comments relating to occupational issues involving your working environment. Inappropriate use can possibly leave colleagues exposed to "Misconduct allegations". We strongly advise all members to be extremely cautious on discussing any matters that could potentially identify what you do in your occupation when using these sites. Don't put your security vetting status at risk, or potentially your career in jeopardy!

Nigel Dennis
General Secretary
Civil Nuclear Police Federation
